

## Accordion Shutter Benefits

- *Storm Protection*
- *Added Security*
- *Light Control*
- *Privacy*

Accordion Shutters are easy to operate, attractive and can be equipped with Porthole Windows to permit light in during a storm.

They can stack away from the opening to allow a complete and unobstructed view. They can also be equipped with a variety of keyed locking devices when security is an issue. When you combine them with our maintenance service they can last a very long time.

## How Do Accordion Shutters Work?

The Accordion Shutter consists of aluminum interlocking blades, with wheel supports at the top that slide on a horizontal track. They are operated by pulling each curtain of blades towards the center of the window and latching the curtains together by use of a locking mechanism. The lock is re-enforced with what are called locking rods, usually two 1/2" aluminum rods that when screw knobs are tightened, the rods lock in place.

Accordion Shutters can cover a variety of openings: standard windows and doors, curved windows, bay windows, inclosing your balcony or security for store front windows and doors.
