

## Bahama Shutter Benefits

- *Storm Protection*
- *Aluminum Strength*
- *Light Control*
- *Privacy*
- *Adds Architectural Charm*

Bahama Shutters have a Caribbean style that allows cool breezes and soft diffused light to pass through. They allow privacy and provide protection from the effects of the sun on floors, furniture and draperies.

The beauty of the Bahama Shutter is time tested. They are easy to maintain and easy to close. If you want hurricane protection that can add distinctive architectural accents to your home or office building then these classical shutters are your best choice.

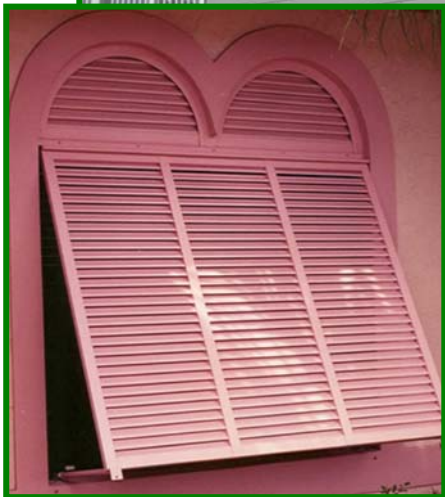

## How Do Bahama Shutters Work?

The Bahama Shutter, one of the original window protection products, is made of fixed horizontal louvers, secured permanently in a frame that is mounted above the window. Constructed from aluminum, which can give the appearance of wood, it is mounted with a hinge at the top and supported by adjustable supports at the bottom. When lowered, it protects from wind, rain and debris, when raised it gives shade and privacy.

Bahama Shutters cover standard and specialty shaped windows. They are great for store front windows where shade and privacy is needed.

There are some size limitations.
