

Double Roller Shade Benefits

- *View Options*
- *Light Control*
- *5 Rail Options*
- *Privacy Options*

Double Roller Shades come in three sizes of horizontal bars which allow for different viewing options. These blinds offer the elegant look of Horizontal Sheers while still retaining the smooth look of a Roller Shade.

The Double Roller Shade, contrary to its name, uses one roller tube and one piece of fabric. This unique and elegant fabric creates horizontal bands of privacy and sheer fabric, so that when the fabric is doubled over upon itself, it can create privacy or a sheer view. The look, although similar to the Horizontal Sheer shade, is quite different. Especially when using the Skiathos XL (stripe width: 25 cm) and Kos XXL (stripe width: 40 cm). The fabrics are stunningly beautiful and the viewing options make it the perfect choice when privacy is only sometimes needed.

How Do Double Roller Shades Work?

The Coulisse Double Roller Shade consist of a roller shade tube mounted inside a cassette, a smaller roller tube located in the bottomrail and material which consists of bands of privacy fabric and sheer fabric. The material is mounted to the tube located in the cassette, passed through the roller located in the bottomrail, and then mounted back at the top, to the front inside of the cassette. Then, by rolling the material onto the top roller tube, the privacy and sheer bands pass by each other causing either a look of alternating privacy and sheer bands or a look of solid privacy bands. The controls can be manual clutch or motorization.

Double Roller Shades can cover a variety of window sizes, sliding glass doors and do have size limitations.
