

## Sliding Panel Track Benefits

- *Reduced Energy Cost*
- *Stop UV Ray Damage*
- *Reduce Sunlight Glare*
- *Light Control*
- *Privacy*

Sliding Panel Tracks come with a variety of fabric choices that will allow a wide range of views and light control options. They are also used as room dividers and each panel can move independently.

The Sliding Panel Track system is a new take on the vertical. This product will create a statement for your home décor, whether you have a sliding glass door or a large span of windows. The fabric selection is endless, even available with laser cut designs, and each panel can be a different fabric or color. Room dividers have become a more popular choice with this product as the design options with panel size and controls are limited only by your imagination. The sleek looking track and ease of operation makes this product a beautiful addition to your home.

## How Do Sliding Panel Tracks Work?

The Sliding Panel Track system consist of a track that has 2 to 5 channels and can be combined with other tacks to expand your stacking options. Hangers slide inside each channel and are usually controlled by the lead hanger pulling the other hangers forward or backwards. The fabric panels are connected to these hangers usually via Velcro for easy alignment or replacement. Controls can be cord pull, baton wand, free floating or DC motor. The fabric can then be pulled closed covering the entire opening or pulled opened where all panels stack behind the first panel.

Sliding Panel Tracks can cover a variety of window sizes, sliding glass doors and act as a room divider while using a variety of fabrics and control options.
